EDUCATION

**Balıkesir University
(Bachelor's Degree in Computer Engineering)** — 09/2021 – 06/2025

Simav Science High School — 09/2017 – 06/2021

SUMMARY

As a computer engineering student, I have a strong technical background in modern web technologies (React, Next.js, TypeScript, Python) and machine learning applications. I have developed hands-on projects in various sectors such as e-commerce, artificial intelligence, recommender systems, and algorithmic trading. With my skills in teamwork, analytical thinking, and rapid adaptation, I aim to contribute to innovative software and AI projects in diverse fields such as defense, finance, and healthcare. I am eager to continuously improve myself and take an active role in multidisciplinary projects.

WORK EXPERIENCE

2KEKGAMES – Full Stack Developer (Part-Time) — 01/2024 – 06/2025
- Developed modern web applications using React, Next.js, TypeScript, and Python.
- Took part in REST API and database integrations (Supabase, Firebase, MySQL).
- Contributed to AI-based projects and machine learning processes within the team.
- Managed VPS and performed backend programming tasks.
- Actively participated in code versioning (Git) and project management.

2KEKGAMES (Intern) — 07/2024 – 08/2024
- Analyzed financial data and developed algorithmic trading strategies.
- Performed data analysis and modeling using Python.

TKI (Intern) — 07/2023 – 08/2023
- I designed modern and user-friendly web interfaces.
- I took an active role in front-end projects within the team.

Amazon Marketplace — 11/2021 – 12/2023
- Managed sales of textile and 3D-printed products in the Canadian and US markets via Amazon.
- Independently handled product listing, customer relations, and all logistics processes.
- Focused on increasing sales volume through sales analysis and campaign management.
- Developed basic scripts to automate e-commerce platform operations.

PROJECTS

MediMind:
- Developed an AI-powered chatbot for healthcare services.

Movie Recommendation Platform:
- Designed a personalized movie recommendation platform based on user preferences.

VoiceHealthApp:
- Developed a machine learning application for disease prediction using voice data.

Personal Portfolio Website:
- Built a personal website to showcase my projects and skills.

Best Camera Review:
- Created an informative website featuring camera and equipment reviews.

CERTIFICATES

- **Machine Learning (DeepLearning.AI, Stanford)**
- **React (Meta)**

SKILLS

React, Next.js, TypeScript, JavaScript, Python, Node.js, REST API, Supabase, Firebase, MySQL, Machine Learning, Deep Learning, Recommender Systems, Git, VPS Management
